

# Garlon® Ultra

## Garlon® Ultra

For the control of invasive, woody and broad leaved weeds.

# Garlon® Ultra

The ideal product for the control of a wide range of invasive and difficult to control weeds and scrub.

BEFORE

AFTER

Picture on the right taken 12 months after application of **Garlon® Ultra** on Japanese Knotweed

- It contains Aminopyralid and Triclopyr.
  - This combination provides excellent control of woody and invasive weeds.
- Can be used through a hydraulic tractor or quad mounted boom sprayer
- It can also be applied through a hand held application equipment
  - one of the few products with a label fully cleared for this type of use.
- Rainfast in just one hour
- It is fast acting and controls a wide spectrum of weeds
- It moves through the roots ensuring high levels of long term control.
- Virtually no odour
  - increased operator comfort

## Maximise Success with Garlon® Ultra

- Peel open the label and read before use
- Use through a knapsack or boom applicator
- Choose the correct rate of application from chart below depending on target weeds
- For optimum results spray weeds whilst actively growing and before they flower,
- Not all weeds will be at the best growth stage for spraying at the time of application,
  - so a follow-up treatment may be necessary
- Spray weeds till they are thoroughly wet, but stop before the spray runs off the leaves
- Always direct spray away from water
- Other people and pets should keep out of treated areas until the spray has dried on treated foliage (approx. 2 hours)
